

PUMPS

theory + operation + maintenance

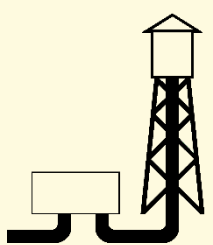

Find pump jobs at
Water and Wastewater Utilities
Refineries and Power Plants
Food and Chemical Processing Plants
Agricultural Facilities
Practically everywhere

*Some reasons why you should take **MACHINE TECH 208.***

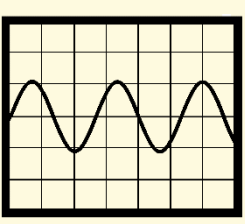

THEORIZE

the basic physics of fluid flow and hydraulics in piping systems

OPERATE

models and test equipment to gain control over system performance

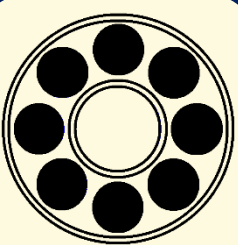

MAINTAIN

pump health whether responding to trouble or keeping it from happening in the first place

REPAIR

and rebuild full-size industrial pumps using hand tools and precision machine tools

DIAGNOSE

common machinery components like rolling element bearings, mechanical seals and shafts
