1. It is imagined that a less formal Q&A will also occur during the break time.
2. USD will provide one SME/Instructor to answer SFPUC questions regarding development of modules with the Technical Training Coordinator and Instruction of the Training Module to District employees.
3. Depending on what activity is occurring in the Corporate Yard, hard hats **may** be required. Participants may bring their own and leave them in their vehicles. The District can supply hard hats if they are needed. While the likelihood is small, it still must be mentioned.
